

### Control panel models

The control panel SmartLiving system is offered in 5 versions, all in metal enclosures.

**SmartLiving505**, **SmartLiving515** and **SmartLiving1050** with housing for a 7Ah battery, **SmartLiving1050L** and **SmartLiving10100L** with housing for a 17Ah battery.

The application range of this system spans from just five terminals with the "505" version, to a hundred terminals with the "10100" version.

The five control panel models are certified EN50131-3 Grade 3 and EN50131-6 Grade 2.

There are three certified Grade 3 ("G3") models also for EN50131-6 certification.

### The technologies and the BUS

The **FlexIO** technology evolutionizes the static perspective of inputs and outputs and provides the installer with a more adaptable approach to system customization and what is more, a different perception of in-stock needs. SmartLiving allows the mapping of the terminals that distributes the available terminals on the peripherals (keypads and expansions) without "losing" the unused terminals. Application of **Easy4U** technology provides installers and end users the concept of "shortcuts" that makes system control effortless and greatly simplifies system programming, which is fully piloted by this straightforward interface.

Inim's **I-BUS** is capable of managing complex topologies, providing fast-load-insensitive response and end-to-end noise immune voice transmissions, all without need of any extra wiring.

The voice board **SmartLogos30M** offers voice over bus transmissions thanks to **VoIB** technology.

The bus accepts proximity readers, keypads with graphic displays, input/output expansions, wireless transceivers, GSM diallers and sounderflashers. The SmartLiving system is capable of enrolling all the bus peripherals automatically, thus further smoothing the process of system configuration.

The I-BUS can be protected, sectioned and regenerated by means of **IB200** bus isolators/regenerators.

### System functions, features and options

The SmartLiving control panels allows the correlation of the actions and **events** the system manages. Each of the system events can be associated with output actions, voice dialler actions and digital dialler actions.

The system can be accessed by user **codes** and proximity keys/cards. Each code/key/card has its own accesses to the partitions and the functions of the system. It is possible to associate each code with one of the timers which can then be programmed to enable/disable it at certain times of the day.

The system is capable of managing both hardwired and **Air2**"Air2" wireless peripherals. This type of configuration allows it to integrate the new-generation wireless capabilities provided by the "Air2" two-way transceiver.

The system offers an all-set-to-go Voice dialler and a likewise friendly Digital dialler that readily satisfies all the requirements of alarm receiving centres.

If you wish to provide the system with an alternative communication channel over the GSM network, it is possible to use the **Nexus**. These GSM devices manage voice and digital communications, receives SMS commands and sends programmable SMS messages when specific events occur. The models **Nexus/G**, **Nexus/3G** and **Nexus/4G** allow remote programming and supervision of the control panel over the GPRS connection and communication with alarm receiving centres via SIA-IP protocol.

The **SmartLAN/SI** or **SmartLAN/G** optional boards provide TCP/IP connectivity. They allow end users/operators to access the system via the Internet and provide a web-server function. The latter allows end users/operators to connect to the control panel from any PC and verify the status of the system and interact with it.

The web server offers advanced features such as customizable interactive graphic maps, or the possibility to access ONVIF video verification functions.

In addition, all SmartLiving control panels are ready for **Cloud** connectivity. Through the use of a device as Nexus/G, Nexus/3G, Nexus/4G, SmartLAN/G or SmartLAN/SI, the SmartLiving panels can access to the revolutionary Inim Cloud service, which allows advanced management functionalities via the web. The connection of the control panels to the Cloud is "plug 'n play", that means that they do not require any configuration on the network on which they are installed. In this way all the control panel management is easily accessible from the web via browser and via app AlienMobile+ for smartphone and tablet. The control panel can be programmed from any LCD keypad or via a PC running **SmartLeague** SmartLeague software.

Programming from an LCD keypad is quick and easy, as it is possible to use the default settings which completely eliminate the need to configure the parameters of the Voice dialler and Digital dialler.

The high-speed RS232 port reduces local on-site programming to a split-second task.

## Main features of SmartLiving systems

	SMARTLIVING				
	505	515	1050 1050/G3	1050L 1050L/G3	10100L 10100L/G3
<b>Hardware characteristics</b>					
Maximum number of terminals in the system	5	15	50	50	100
Number of mappable or relocatable terminals in the system	5	15	50	50	100
On-board terminals (which can be configured as input/output)	5 (0)	5 (0)	10 (5)	10 (5)	10 (5)
Programmable relays on the main board	1	1	1	1	1
Programmable open-collector outputs on the main board	2 (150mA)		2 (500mA)		
Manageable partitions	5		10	15	
Relay and power-diffusion board (AuxRel32)	-	-	-	Yes	
IP Connectivity management (using SmartLAN/SI and SmartLAN/G)			Yes		
Digital communicator with SIA-IP protocol (options SmartLAN/SI, SmartLAN/G, Nexus/G Nexus/3G and Nexus/4G)			Yes		
Housing for Flex5 expansion board in the enclosure	-	-	-	Yes	
Housing for Nexus GSM device in the enclosure			Yes		
Power supply	1.2A	1.2A	3A	5A	
RS232 port			Yes		
Power charge monitored by temperature probe (ProbeTh accessory item)			Yes		
Battery efficiency test			Yes		
Reprogrammability of control panel firmware			Yes		
Peripheral-firmware upgrading capability via control panel			Yes		
Housing	Metal enclosure				
Battery housing	7Ah			2x17Ah	
Dimensions (HxWxD):	305x215x82 mm			497x379x92 mm	
Weight (without battery)	2.5 Kg	2.5 Kg	2.2 Kg	5.1 Kg	5.3 Kg
<b>Devices on I-Bus</b>					
Peripheral self-learning on the I-Bus			Yes		
Keypads Aria/HG, nCode/G, Concept, Alien and Joy <sup>1</sup>	10		15	15	
nBy proximity readers <sup>2</sup>	10		20	30	
Flex5 5-terminal expansion boards	4	10	20	40	
Sounderflashers (Ivy-B)			10		
Air2 transceivers (with automatic channel search)	4	10	20	30	
Nexus dialer			1		
<b>Air2 series wireless devices</b>					
MC200 and MC300 magnetic contacts, XIR200W infrared detectors, XDT200W and DT200T dual tech detectors, FD100 smoke detectors UT100 universal transceivers, OTT100W e ODI100W outdoor detectors	5	15	50	100	
Aria/W wireless keypads for each BS200			4		
Hedera wireless sounderflashers for each BS200			4		
Remote control keyfobs (KF100, Pebble, Ergo <sup>3</sup>	50		100	150	
<b>Authentication</b>					
Installer codes			2		
User codes (with associated timers)	30		50	100	
nKey tag or nCard proximity card (with associated timers)	50		100	150	
<b>Telephone communication</b>					
Telephone contact numbers			15		
Phone line availability check			Yes		
Automatic voice communicator (SmartLogos30M option, see also voice functions)			Yes		
Integrated automatic digital-dialer (ContactID, SIA, pulses)			Yes		
Integrated remote programming modem			Yes		
<b>Input terminals (zones)</b>					
Self-learning of zone balancing •			Yes		
Management of two separate zones on each input terminal			Yes		
Input terminals on the control panel for shock and roller blind sensors			2		
Input terminals on keypad for shock and roller blind sensors	2 for Joy and Aria/HG, 1 for nCode and Concept				
Input terminals on expansion board for shock and roller blind sensors (out of 5 available as input/output)			4		
Thresholds of programmable input zones			Yes		
Calibration of input thresholds •			Yes		

## Main features of SmartLiving systems

SMARTLIVING				
505	515	1050	1050L	10100L
		1050/G3	1050L/G3	10100L/G3

### Additional functions with optional components

Advanced voice functions with SmartLogos30M board	Yes
GSM functions with Nexus, Nexus/G, Nexus/3G and Nexus/4G modules	Yes
GPRS functions and SIA-IP connectivity with Nexus/G, Nexus/3G and Nexus/4G modules	Yes
TCP-IP connectivity with SmartLAN/SI board	Yes
TCP-IP connectivity and web-server functions with SmartLAN/G	Yes
Management via apps with smartphone or tablet	Yes
Inim Cloud services	Yes

### Other features

Weekly timer with two time slots per day (each with 15 exception periods)	10	20		
Manual, daily and weekly programmable thermostats with antifreeze feature (Joy/MAX, Alien/S, Alien/G, Air/HG)	5	10	15	
Programmable events with timer and counter management	10	30	50	
Management of summer/winter time	Yes			
Programmable arming scenarios (settings for partition status)	30			
Programmable output scenarios	50			
Types of shortcuts for immediate actions	38			
Programmable icons	50			
Number of events that can generate actions	417	487	902	1497
Recordable events	500	1000		
Choice of events to memorize	Yes			
Compressed event storage	Yes			
Management of shortcuts via function keys (12) and number keys (10) on keypads	Yes			
Management of shortcuts via LEDs (4) on nBy readers	Yes			
Event-based action generation matrix	Yes			
Generation of action when the event occurs	Yes			
Generation of action when the event restores	Yes			
Zone test from keypad	Yes			
User-friendly programming software (runs under Windows)	Yes			

### Certifications

	505	515	1050	1050/G3	1050L	1050L/G3	10100L	10100L/G3

## ORDER CODES

- SmartLiving505:** intrusion control panel with 5 terminals, 5 partitions, 1.2A power supply, optional connectivity over GSM/GPRS and TCP/IP.
- SmartLiving515:** intrusion control panel with 5 to 15 terminals, 5 partitions, 1.2A power supply, optional connectivity over GSM/GPRS and TCP/IP.
- SmartLiving1050:** intrusion control panel with 10 to 50 terminals, 10 partitions, 3A power supply, optional connectivity over GSM/GPRS and TCP/IP.
- SmartLiving1050L:** intrusion control panel with 10 to 50 terminals, 10 partitions, 3A power supply, optional connectivity over GSM/GPRS and TCP/IP.
- SmartLiving10100L:** intrusion control panel with 15 to 100 terminals, 10 partitions, 5A power supply, optional connectivity over GSM/GPRS and TCP/IP.
- SmartLiving1050/G3:** intrusion control panel with 10 to 50 terminals, 10 partitions, 3A power supply, optional connectivity over GSM/GPRS and TCP/IP. EN50131-6 grade 3 certified.
- SmartLiving1050L/G3:** intrusion control panel with 10 to 50 terminals, 10 partitions, 3A power supply, optional connectivity over GSM/GPRS and TCP/IP. EN50131-6 grade 3 certified.
- SmartLiving10100L/G3:** intrusion control panel with 10 to 100 terminals, 15 partitions, 5A power supply, optional connectivity over GSM/GPRS and TCP/IP. EN50131-6 grade 3 certified.
